

Projekt Nr. 1: Circles, Circles, Circles, ...

In Unna, a town in Germany, there is a tower of an old brewery. There are numbers on it, starting at the bottom with 1. Then the sequence continues with 1, 1, 2, 3, 5, 8, Do you see a pattern of this sequence? How can you calculate the next numbers?

What does this famous sequence, called "Fibonacci sequence" have to do with pictures 2, 3, 4 and 5? What does picture 6 have to do with pictures 2, 3, 4 and 5? Do you have now an idea of our first project?

Describe the project idea in your own words!

- I would like to work with coloured paper.
- I would like to create the shapes by using GeoGebra, print it out and then colour with pencils.
- I like to create an artwork only using the colours of the famous painter Mondrian.
